

# NORDIC LEAVES

WALLPAPERS FROM SCANDINAVIA

A detailed botanical illustration of a parsley plant, showing its characteristic umbrella-shaped inflorescence (umbel) and finely divided, feathery leaves. The drawing is rendered in a light, muted green color against a plain white background. The central part of the plant is the largest and most prominent, with several smaller, similar structures branching out from it, creating a sense of depth and natural growth.

# Elephant Grass

A stylized, high-contrast illustration of Elephant Grass. The image features several vertical stems with long, narrow, blade-like leaves. The leaves are rendered in two colors: a light gray and a dark black, creating a layered, overlapping effect. The stems are thin and light gray. The overall composition is dense and vertical, filling most of the frame.
